EDUCATION

Stony Brook University Stony Brook, NY
Master of Science in Data Science. *Expected May 2027*
Relevant Coursework: Data Analysis & Statistical Modeling, Statistical Learning, Probability, Big Data Analytics

Bengaluru North University India
Bachelor of Computer Applications. *Sept 2024*
Relevant Coursework: Python, SQL, Database Management Systems, Software Engineering, Data Science, R Programming

EXPERIENCE

Business Analyst Intern Oct 2024 – Jan 2025
AGR Knowledge Services – Avalon Consulting *India*

- Collected, cleaned, and analyzed **10K+ data points across client engagements** using **SQL, Python, and Excel**, improving the speed and consistency of decision-support analysis by **30%**.
- Built automated **Power BI dashboards** for KPI reporting, competitor activity, and market trends for WeWork, Bajaj, and Maersk; reduced reporting turnaround by **30%**.
- Designed and maintained **SQL-based reporting workflows** and structured datasets for recurring client deliverables, improving data retrieval efficiency by **10%**.
- Delivered competitor, pricing, positioning, and market analysis with **leadership recommendations**; collaborated across teams to standardize reporting workflows and improve process efficiency by **10%**.

PROJECTS

Olist Growth & Retention Analytics: From Requirements to Recommendations
https://github.com/dhanyashrimarianna/olist-growth-analytics
Simulated BA engagement on public Olist e-commerce data (99K orders) | PostgreSQL, Python, statsmodels, Git

- Defined **9 KPIs and 13 requirements** in a BRD, mapped stakeholders with RACI, and wrote **12 user stories with acceptance criteria** to translate business questions into measurable analytics requirements.
- Built a **PostgreSQL star schema** with **11 automated data-quality checks**; investigated customer ID logic and corrected it to prevent a misleading 0% repeat-purchase rate.
- Investigated funnel, cohort retention, and delivery performance using **SQL and Python**: **3.0% of 93K customers** reordered; late deliveries averaged **2.27** review stars versus **4.29** on-time.
- Tested delivery and repurchase associations using confidence intervals and a two-proportion z-test (**0.92% vs. 1.25%, p = 0.027**); refined recommendations based on category variation (**0.80% to 1.75%**).
- Prioritized **four** improvement opportunities using RICE and sensitivity analysis, drafted a PRD, and designed an A/B test with approximately **9,100 customers per group** to detect a **+0.5-point** lift in 90-day repeat rate.

Payment Success Optimization & Analytics Dashboard (PayNext)

- Generated and analyzed **50,000+ synthetic payment transactions** using EDA and feature engineering to identify failure patterns across retry counts, gateway latency, payment methods, devices, and geographies.
- Built a **Random Forest classifier** in Scikit-learn with **85% accuracy** in predicting transaction success; used model outputs to simulate smarter routing decisions.
- Designed **Power BI and Matplotlib dashboards** for payment success, failure reasons, and gateway performance; translated findings into recommendations for retry logic and gateway optimization.

SKILLS

Programming & Querying: SQL (CTEs, Window Functions), Python, R
Business Analysis & Product: Reporting Requirements, KPI Definition, BRD, User Stories, Acceptance Criteria, Stakeholder Mapping (RACI), Process Improvement, RICE Prioritization, PRD, A/B Test Design
Analytics & ML: Data-Quality Checks, EDA, Cohort & Funnel Analysis, Hypothesis Testing, Pandas, NumPy, Statsmodels, Scikit-learn, Feature Engineering, Predictive Modeling, Random Forest, Logistic Regression
BI & Visualization: Power BI, Dashboards, KPI Reporting, **Excel** (Pivot Tables, Power Query, XLOOKUP), Tableau, Matplotlib
Databases & Tools: PostgreSQL, MySQL, Star Schema Modeling, Git, GitHub, Jupyter, Google Colab, VS Code, RStudio
